Within Everyone's
Reach Across India**
Through Our
Preventive Diagnostics
& Healthcare Solutions

Indian Healthcare - The Changing Dynamics

Mission

To make quality healthcare services available to all the citizens and reduce per capita medical expenditure by using innovative health technology

Vision

Optimum health across the lifespan for the population we serve

We Provide

End-to-end solutions in industrial occupational check-ups

Integrated disease surveillance programs

Health analytics for predictive and preventive actions

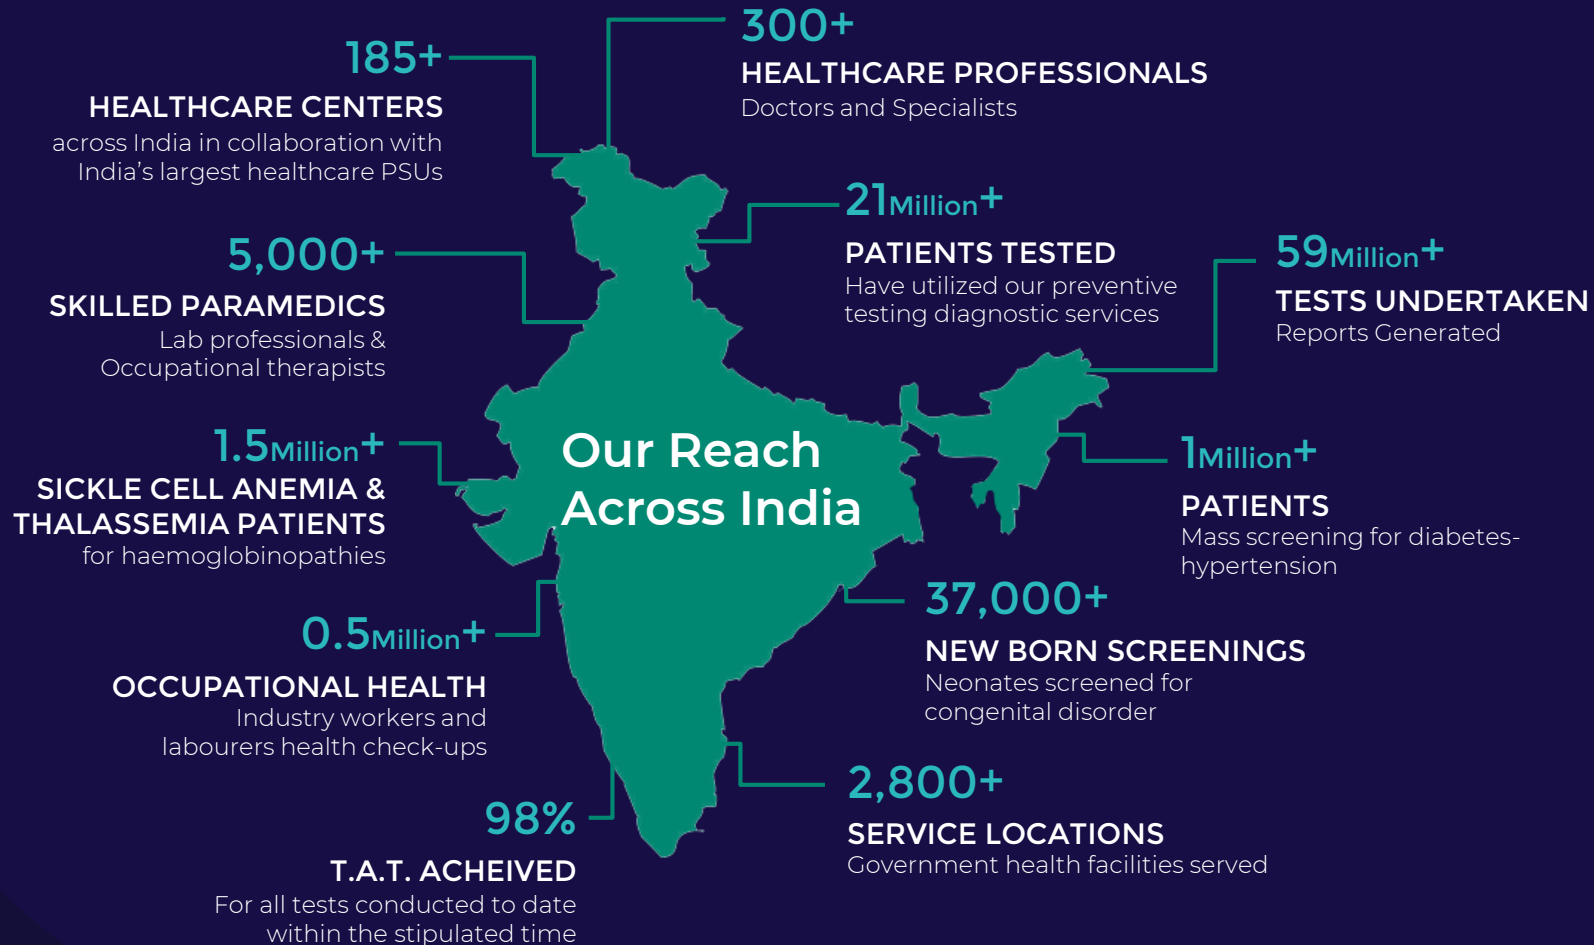

Population screening for non communicable diseases

Electronic medical records and health registry

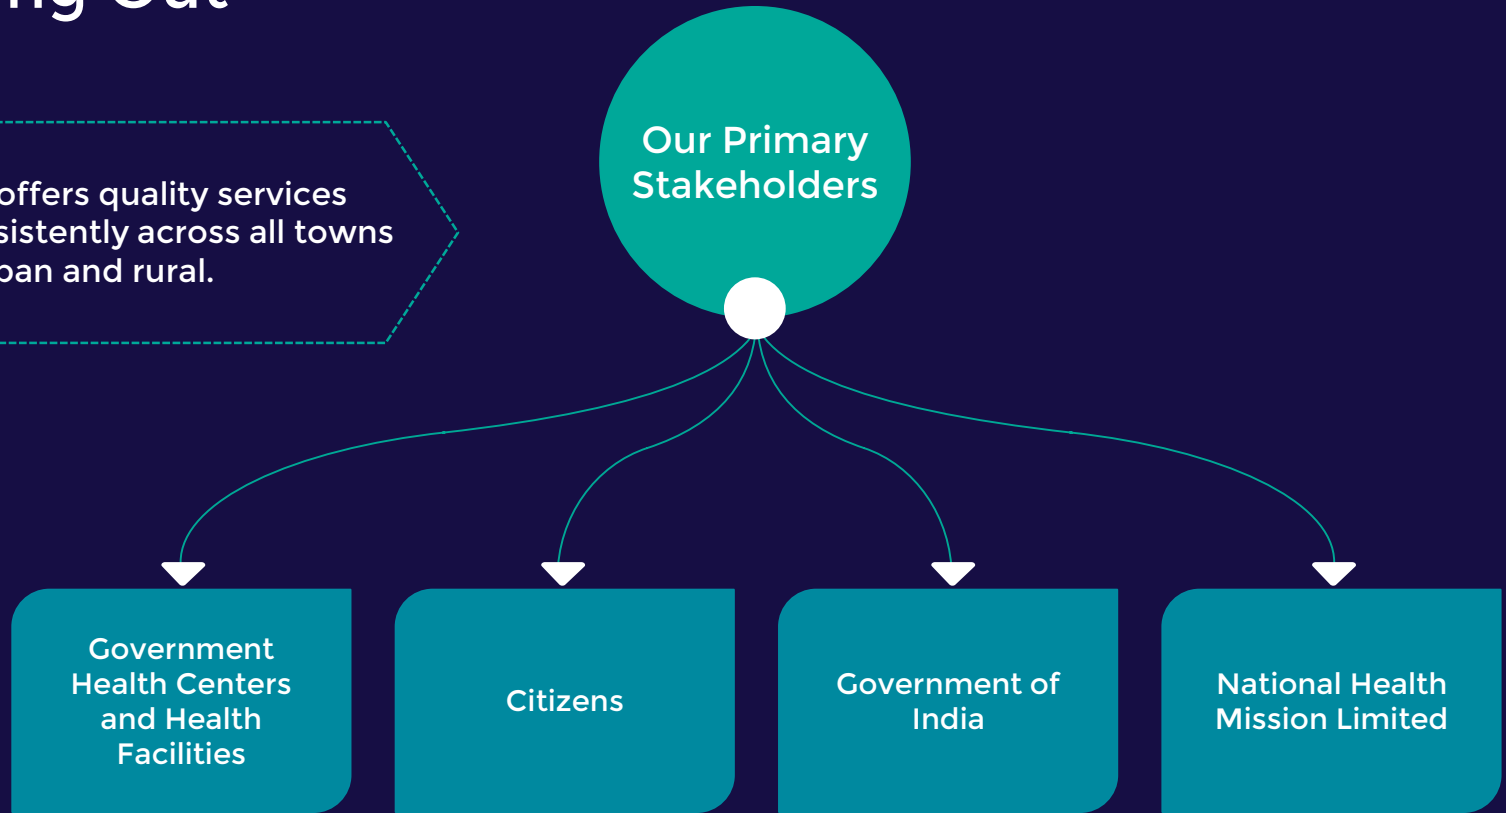

Wellness programs for lifestyle diseases

Reaching Out

We offers quality services
consistently across all towns
- urban and rural.

Our Key Objectives

Primary Objectives

Ensure availability of diagnostic laboratory facilities to cater to the clinical needs up to the level of Primary Health Centers (PHCs)

Enable initiation and continuation of appropriate treatments based on accurate and timely diagnosis

Improve overall quality of healthcare and patient experience

Reduce high out-of pocket expenditure incurred by the people in India for diagnosis

Use of appropriate diagnosis to screen patients for chronic conditions to enable secondary preventive measures

Strengthen healthcare infrastructure through excellent planning

Secondary Objectives

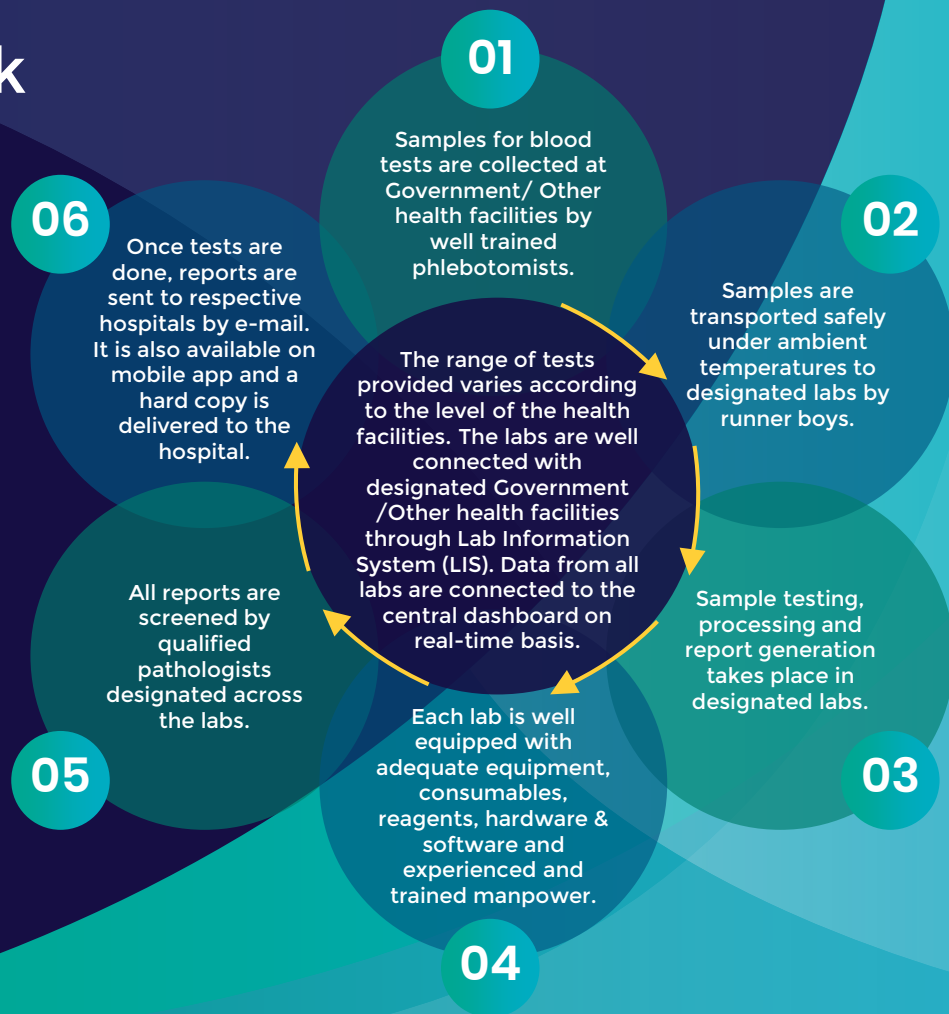

Vast employment creation in healthcare sector

Scope of Research (Pool of Data, Surveillance)

Lifinity Wellness

Scope of Work

Establishing A Wide And Deep-rooted Coverage

**Extensive Coverage
and Best Quality
Diagnostic Services
Across India**

Lifinity Wellness

Modern Infrastructure at our Labs

- All labs are equipped with **world-class automated diagnostics machines** for processing of normal and special tests.
- All the equipment at the labs are **interfaced with Laboratory Information Systems (LIS)** to reduce pre-and post-analytical errors resulting out of manual entries.
- An equipment maintenance plan is prepared, followed and closely monitored.
- All the equipment is calibrated at requisite intervals. **Records for equipment calibration are maintained electronically** at all the laboratories.
